My wife and I have lived a few houses down the street from the applicant address for 41 years. We have had poor to no cell phone service at our house. We are dependent on signal extender for cell phone service at our house. In a power outage we have poor service with many dropped calls and no data retrieval at all. The applicant has been a good business in the neighborhood for over 42 years. We urge approval of the cell tower construction for our and our neighbors for the convenience and safety of a reliable cell phone service that we hope a new transmission tower will provide. Respectfully, Douglas and Marguerite Erickson 1081 Long Pond Rd. Brewster MA 02631
