I would like to submit my support for the planned Upper Cape YMCA project in Falmouth. As someone who drove his children several towns away in order to get them in swim lessons and later for swim team practices and meets, I know firsthand that there is a real need for an aquatic center in this upper cape area.

The proposed location next to the Falmouth High School is ideal as it will provide an opportunity for the inclusion of a swim team at the school as well as other wellness activities that are not currently available. In addition, the facility would provide services to the whole population of the area, from toddlers to seniors, strengthening the community through inclusion and common interests.

Development of any site has challenges, but this location is ideally situated for access of the primary participants on without many topographic, environmental, or logistical challenges.

Please consider the overall positive impact that this project would have for the surrounding community and beyond while you perform your regulatory review.

Thank you.
